

IEEE GLOBECOM 2023

4-8 December 2023 // Kuala Lumpur, Malaysia

CALL FOR PAPERS

Intelligent Communications for Shared Prosperity

SAC Symposium: E-Health

Co-Chair

- Andrea Sciarrone, University of Genoa, Italy. <andrea.sciarrone@unige.it>

Scope and Motivation

The e-Health track provides an opportunity to bring together healthcare professionals, researchers, scientists, engineers, academics and students from all around the world to share their experience and latest advances on new technologies and systems development in different healthcare and medicine applications. It provides a point to discuss recent developments and to present cutting-edge innovations in all aspects of the field and share the latest updates on new technologies, solutions and applications that would shape the new generation of networks and systems related with healthcare and medicine.

E-Health is one of the major research topics that have been attracting cross-disciplinary research groups. It enables new approaches to independent living, integrated health and social care and the rapid growth of using such themes in medical fields has created new opportunities for emerging application development. However, enormous challenges still remain to be resolved in order to develop optimized, flexible, reliable, secure, and power-efficient networks suitable for medical needs that can help accelerate scientific research and early diagnosis of diseases and more effective treatments.

Topics of Interest

To ensure complete coverage of the advances in this field, the E-Health Track of the SAC Symposium solicits original contributions in, but not limited to, the following topical areas:

- Context awareness and autonomous computing for Ambient Assisted Living
- IoT on eHealth
- IoT solutions for remote or in-home patient monitoring
- Digital Signal Processing (DSP) algorithms towards early diagnosis;
- Mobile Healthcare
- Future mobile networks for Healthcare (e.g. 5G)
- Future technologies for e-Health
- Personal and body area networks
- eHealth applications over 5G networks
- Biomedical and biosensors engineering
- Sensing of vital signs and signatures
- Wearable medical wireless sensors

- In-Body medical sensors communications
- Molecular sensor communications
- E-Health-oriented software architectures (Agent, SOA, Middleware, etc.)
- Autonomic diagnosis and situation awareness (Fall, Activity, etc.)
- Health and wellness measurement, monitoring and intervention
- Health grid and health cloud
- Health monitoring and traffic characterization
- Emerging e-Health applications
- Mobile and cloud computing for e-Health
- Blockchain for e-Health
- Big data analytics for healthcare
- Machine/Deep Learning for e-Health
- Artificial Intelligence (AI) for eHealth application
- ICT-enabled healthcare system
- Security, trust and privacy in e-Health
- E-Health systems for Integrated Care
- Future technologies for the health of the aging brain
- Image and video processing for e-Health

Biography of the Co-Chair

Andrea Sciarrone was born in Livorno, Italy in 1984. He got his Bachelor Degree in Telecommunication Engineering at the University of Genoa in 2007 and the Master Degree Cum Laude in Telecommunication Engineering in 2009 in the same university. In 2014 he got the Ph. D. degree in Ambient Intelligence at University of Genoa where he is currently Assistant Professor and member of the Digital Signal Processing (DSP) Laboratory. His research concerns Signal Processing over Internet of Things, Context and Location Awareness and Safety and e-health Applications. He was the TPC Chair of HealthCom 2022 and currently he is the Chair of the IEEE ComSoc eHealth Technical Committee.

How to Submit a Paper

All papers for technical symposia should be submitted via EDAS. Full instructions on how to submit papers and important deadlines are posted at <https://globecom2023.ieee-globecom.org/>
